

Single System

Flexible and cost efficient TX Single System

Loading and unloading. Linking of the Slide Rail system to the Trolley system is the most cost effective way of bridging long distances to the static stock.

The simple and reliable switch changes the direction of flow.

...and manual single handling

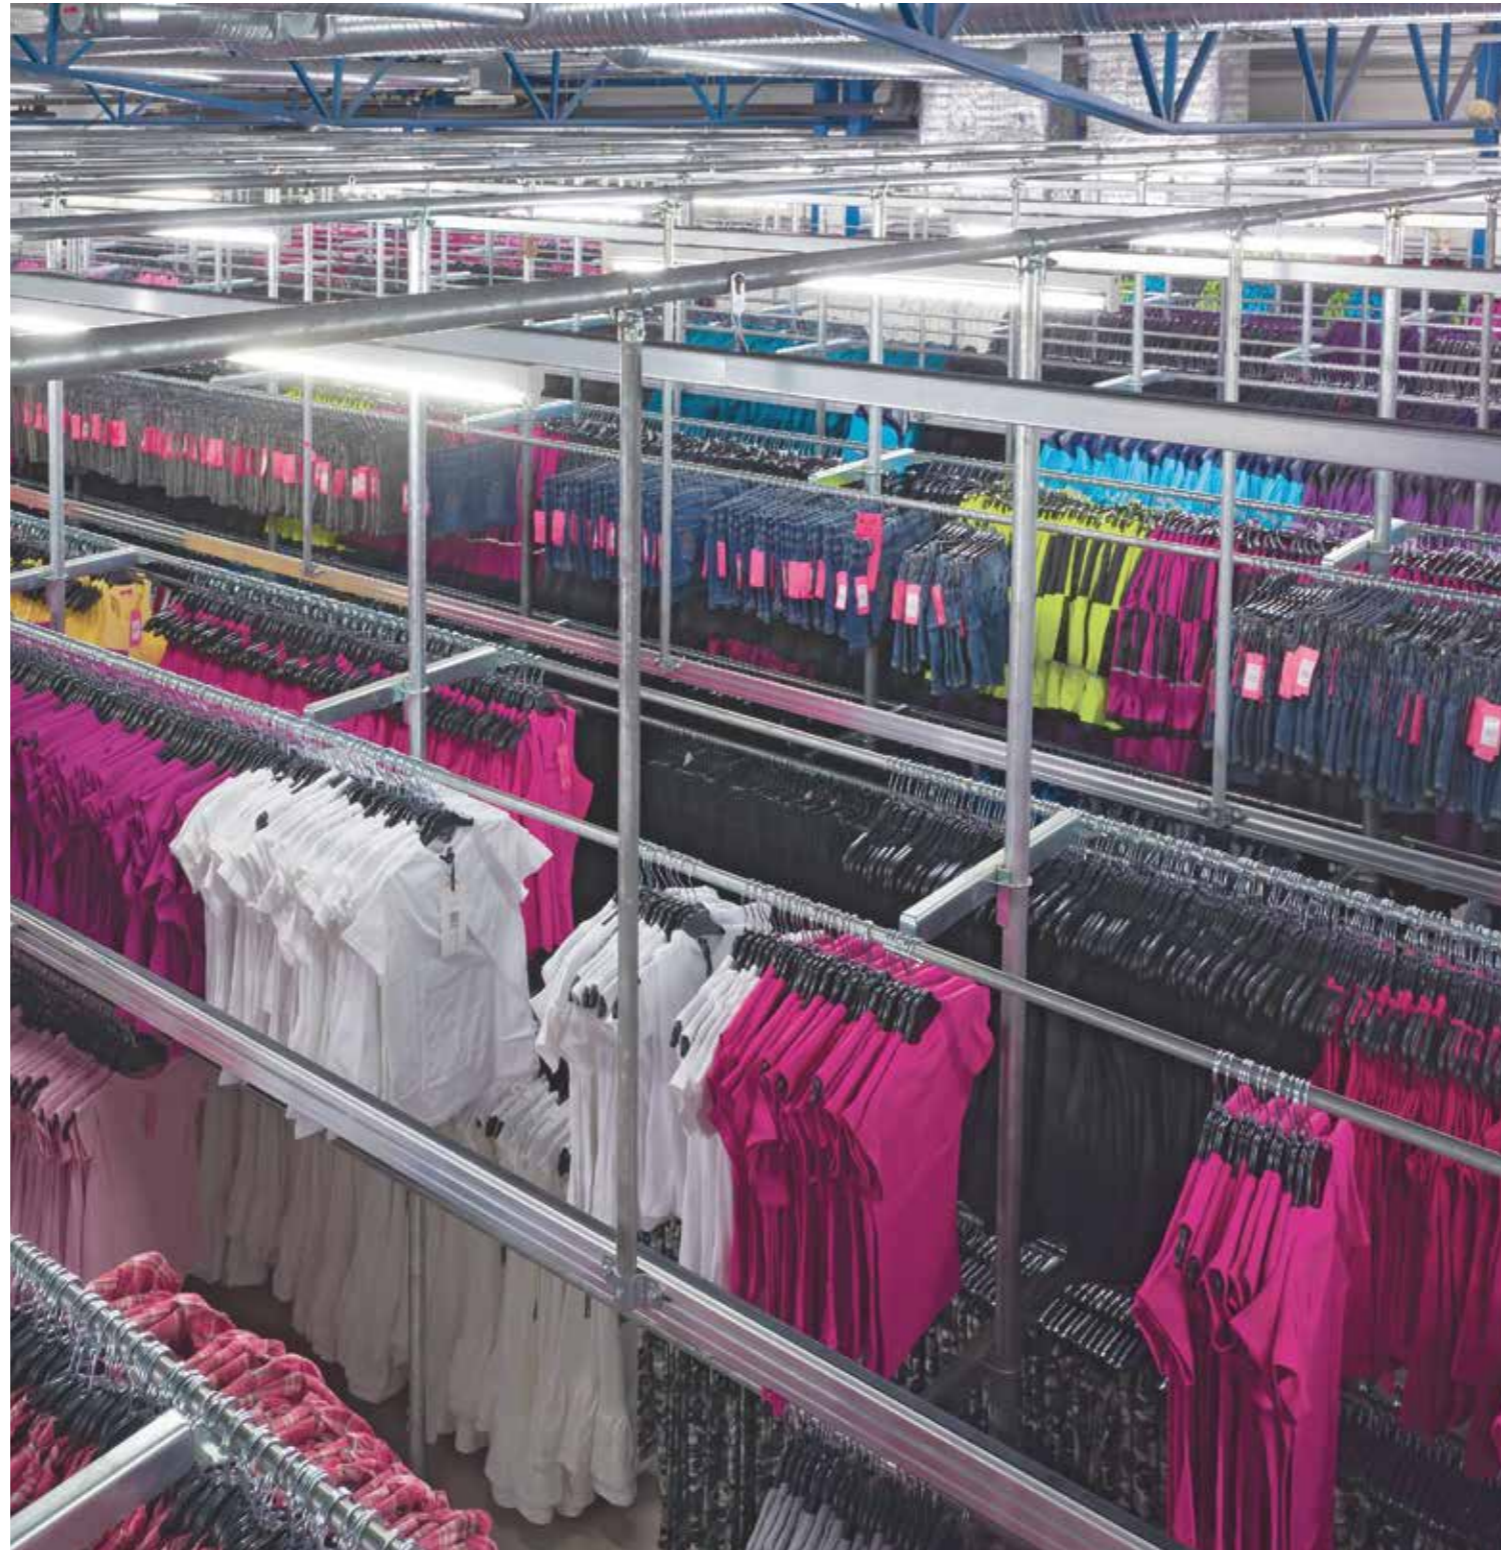

Manual single handling is smooth...

TX Single System is a cost efficient warehouse handling system for hanging items. You will get a solution that puts good use to every square meter of your facility, and that provides you with a high capacity operation.

TX Single System is ideal when you need to handle each garment individually in your process.

The system is very flexible and we provide custom made solutions spanning from the small manual warehouse to fully automatic solutions.

The system can of course be joined to the different machines and work stations required for your process; such as unpacking, finishing, bagging and tagging.

Arrival and departure buffer.

...with TX 200 Slide Rail

Easy to manually push many items simultaneously, due to the plastic covering on the slide rail.

Both automated processes...

TX 200 Slide Rail

- Controlled and organized flow of goods
- Efficient yet simple system
- Gentle handling of products
- Cost effective handling system
- Flexible
- Ergonomic
- Small installation measures for good space economy

The TX 200 has been designed to store great quantities of products without any pressure on the waiting garments.

Sorting to different locations at a laundry.

Patented automatic switches, without loss of height.

Automatic feeding into a tunnel finisher.

Conveyor TX 200...

TX 200 as a "power and free" conveyor. Large quantities of goods can be accumulated and then picked from the front one by one.

Conveyor TX 200

- High capacity system solutions
- Flexible and cost efficient
- Convenient handling
- Minimum staff requirements
- Energy efficient
- Adjustable level of automation
- Almost all types of existing hangers can be used

...the perfect solution for semi or fully automatic handling

Unpacking station, where the garments are fed into the conveyor system.

All your process steps fully integrated...

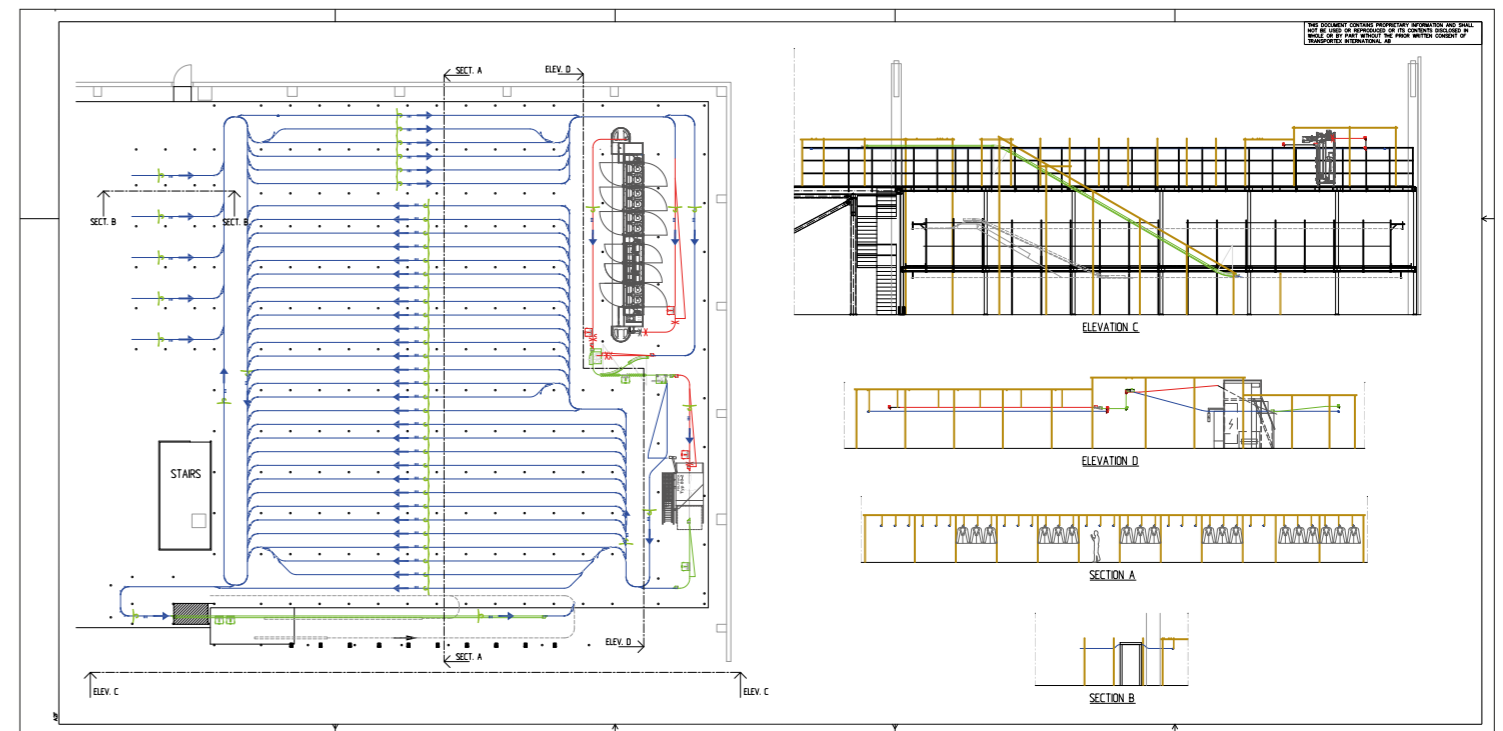

Automatic feeding into a bagging machine.

Our way of working

- We optimize your production flow
- Unique solutions for each customer
- Long term business relations
- Simple to change and extend
- Close co-operation with customer throughout the entire project
- Project teams with experienced project leaders, constructors and erectors
